"All works of taste must bear a price in proportion to the skill, taste, time, expense and risk attending their manufacture. Those things called dear are, when justly estimated, the cheapest; they are attended with much less profit to the artist than those which everybody calls cheap."

Another Effort to Let Contract for Bryan Federal Building.

The following letter from the treasury department at Washington to the Bryan Commercial Club is self-explanatory:

## WILL TRY DIVERSIFICATION.

J. E. Bullock, a prominent farmer of the Steep Hollow community, was in the city today. Mr. Bullock says he is trying diversification methods in his farming this year, and is going to plant only about one-half the amount of cotton that he usually plants. He reports that the farmers of his community are having a hard time to get their corn to growing and several had to replant on account of the cold weather. He reports that the birds are also giving them considerable trouble with their corn, but despite all obstacles he hopes to raise a good crop of feedstuffs this year.

## TEACHERS' EXAMINATIONS.

A special teachers' examination was held at the court house Thursday, Friday and Saturday of this week. Thursday was the day set for examinations for permanent certificates, and Friday and Saturday for first and second grade certificates. There were no applicants for the permanent certificates, but the examinations of yesterday and today were taken by five white and two colored applicants. The examinations were conducted by Pros. C. M. Bethany and W. L. Powers.

## HOW MUCH LONGER WILL WE HAVE TO WAIT FOR RELIEF?

It is one of the strangest things to me that the farmers everywhere will not come together as one body and overflow the desks and tables of our Congressmen and Representatives, asking and demanding protection to the farmers of the country.

We have finished another hard year of hard labor, the cold winter winds have come, and what has the farmer got? Nothing but disappointment, for his hard labor.

Disappointment is not all that lots of our poor farmers are getting. In

looking over my county paper this week I see one full page covered with real estate mortgage sales—the homes of poor women and children who have toiled in the burning heat, thinking that the price of cotton would save their homes.

What shall become of the farmer in a short time if he can't get relief somewhere? The government has not helped us as it promised us, a large portion of farmers are at sea—and sinking. When in the name of our Creator will relief come?—H. A. Gaskins in the Progressive Farmer.
